The group arrives at Kilimanjaro Airport (JRO). Participants are met by a representative of Kilimanjaro Explore and transferred to a hotel in Arusha.

Note:The hotel cost only includes breakfast. Check-in starts at 2:00 PM.

DESTINATION

Arusha Town

ACCOMMODATION

Ngare Sero Mountain Lodge

Day 2: Lake Natron

This day will take place at Lake Natron, a very beautiful and remote place. Often featured in wildlife magazines, Natron is the only place in the world that has red-hued water. The color is attributed to a high content of special bacteria, which have a blood-red color. However, it can only be seen and photographed from a bird's-eye view. Lake Natron has very beautiful African landscapes and wild animals: ostriches, antelopes, zebras, giraffes also live here, but due to its remote nature, there are not many tourists. This is a great place to start or end your safari through Tanzania's northern parks.

It can be quite hot during the day. To freshen up, you can swim in the springs nearby. Water flows into them directly from the slopes of the Ngorongoro Reserve. It is very pure and well-saturated with sulfur. Some scientists believe it is beneficial for the development of bones in the body. We're not sure about that, but it's definitely not harmful.

Several authentic African tribes live around the lake, including the famous Maasai. You may visit their settlements and see their way of life.

A Maasai village visit is available at an extra cost - you are welcome to ask your travel manager for more details if you’re interested!

Additional notes:

This is your first day on safari, so we kindly ask that you pay special attention to the national park visitor rules and our company’s recommendations:

- It is strictly prohibited to exit the vehicle during the safari, except in designated areas. Violating this rule may result in significant fines for the company, including the revocation of its license.
- Off-road driving is also prohibited as it can cause irreparable damage to the delicate balance of the park's ecosystem.
- Smoking is allowed during the safari, but please be extremely careful when extinguishing and disposing of cigarette butts, as they are a frequent cause of fires in the savanna.
- We kindly ask that you do not put your feet on the seats or sit on the backs of the safari vehicle’s seats, as such behavior quickly damages the vehicle.

Thank you in advance for your understanding!

Day 3: Lake Natron

Very beautiful birds live on Lake Natron including large and small flamingos, which can have numbers of tens of thousands at a time! The brilliant pink birds taking flight is a very beautiful sight. Flamingos are very fond of Lake Natron, because here they are guaranteed not to be disturbed by predators because of the water's high alkaline level. Every year from September through to April, more than three-quarters of all Lesser Flamingos in the world are born on Lake Natron. Eggs are laid in the shallow mud of the waters, and new chicks hatch along the shore. Through binoculars, you can watch very small chicks that are just taking their first steps. They are still gray in color, but very soon their plumage will begin to turn pink.

In addition to flamingos, pelicans and other birds are found in the vicinity of Lake Natron. In the wild, they behave completely differently from the zoo - the birds are very active and playful.

Day 4: Lake Natron

Today your guide will take you to the Engaresero Falls. These are picturesque waterfalls, found only by a pleasant hike. The falls are not accessible by car, but you will be led by a guide from the local Masai tribe. It takes approximately one hour, and we advise wearing light shoes that you don't mind getting wet. You can swim in the pools below the waterfall, do not forget your bathing suit and a towel! Wild animals can be seen in the Natron area. Although there are not as many of them as in the Serengeti, you can easily spot giraffes, zebras, ostriches, hyenas, impalas, wildebeests and other savannah inhabitants. Keep your camera ready!

Finally, there is one of the few active volcanoes in East Africa - Ol Doinyo Lengai, the "Mountain of God" in the Maasai language. The area provides excellent photo opportunities to capture African landscapes.

Day 5: Ngorongoro Conservation Area

Today you are going to the Legendary Ngorongoro Crater! Your day will begin early in the morning, when your guide arrives to drive you to the Ngorongoro Crater, part of the Ngorongoro Conservation Area. The Crater is somewhat reminiscent of The Lost World by Sir Arthur Conan Doyle: here you will witness tens of thousands of wild animals living in the massive crater left by a huge ancient volcano. The actual crater is relatively small, when you consider that it is home to the most variety of animals per square meter than anywhere else in the world! Here, you are sure to see a great number of animals within close proximity to one another.

The descent into the crater will take about half an hour of driving. The road passes through beautiful, lush forests with great scenery. Your safari guide will make a stop to see the 'look out' which is a place offering a stunning panoramic view of the entire crater. Contrary to popular myth, animals can go outside the caldera. However, most of them are safe and comfortable inside the caldera which provides an unlimited supply of fresh grass for grazers and easy prey for predators. Therefore, they prefer to remain in the crater t all the time.

Elephants, buffaloes, antelopes, lions, cheetahs, zebras and other African animals can be seen in Ngorongoro Crater. This is one of the few places in Africa where rhinos are found, although, remember that they are an endangered species, so there are very few of them. One animal that is absent are giraffes; you will not spot any of them in the crater because, due to the build of their bodies, including legs and long necks, they cannot walk down into the crater.

After your morning game drive around the crater, you will stop at the picnic area next to Lake Magadi for a snack and rest. This place is popular with various birds, including kites, who sometimes try to steal food right from the table! While not dangerous, at all, it is a good idea not to leave any food unattended. One of the draws of Lake Magadi are the hippos that live in the area. You're sure to enjoy watching them while you eat lunch. These huge animals stay close to the shore and often surface to get air. If you do see one walking out of the water, give it plenty of space. Due to the large number of animals and endemic plants, Ngorongoro Conservation Area is a UNESCO World Heritage Site and renowned for its natural significance in the world.

Please do not feed animals in Ngorongoro or any other parks in Tanzania. Even if you really want to treat a small bird or monkey, you should not do this - you will only harm them. Human food disrupts the natural diet of animals and can lead to their early death!

Remember, this is not just our request. This is a law which is enforced by park rangers. Any person caught feeding wildlife or violating other park rules may be fined.

Kubu Kubu Tented Lodge

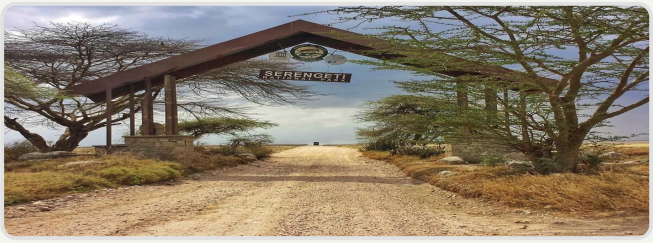

Day 6: Serengeti National Park — Seronera

Today you will go to the most famous safari park in the world - Serengeti. This is one of the largest parks in Tanzania and has a large population of wildlife. Here, you are sure to see: lions, antelopes, elephants, giraffes, buffaloes and zebras. There is a good chance of spotting cheetahs, serval cats and other rare animals of the African savannah. The Serengeti is a designated UNESCO World Heritage Site, chosen because of its important ecosystem, the dense population of animals and the annual Great Migration. Serengeti was the inspiration for Disney's "Lion King" feature film, but life here is not a cartoon - it is pure, wild and beautiful. The day will take place in the central Serengeti, in a remarkably beautiful area called Seronera.

Day 7: Serengeti National Park — Seronera

Your adventure continues in the central part of the Serengeti. Seronera is a huge space, brimming with life. It is impossible to view it all in one day; today, your guide will show you new places and interesting animals, so that you can get a full perspective of Serengeti's Seronera. It is in the Serengeti that the rarest African animals live: rhinos, leopards, serval cats and caracals. This second day increases your chances of seeing these rare animals in the wild.

Kubu Kubu Tented Lodge

Day 8: Serengeti National Park - Seronera

This is your final day in central Serengeti. Every day in the savannah provides something new and exciting, you will not have a repeat of previous days, but will experience something genuinely new: yesterday's lazy lions might be on the prowl today, elephants that walked away will be curious today. A cheetah may even climb atop the safari car, for a chance to see you! It is also an excellent chance to see the famous Kopjes - these remnants of volcanic rock from ancient eruptions are a picturesque part of the Seronera landscape. Animals love to rest in their shade, providing ideal photographs of your time in Central Serengeti.

You'll also see the Simba Rock - Remember the opening scene of "The Lion King" where Mufasa lifts up baby Simba to see all the savannah? Well, you can see it in real life! In Seronera, visit the inspiration for The Lion King, and see the exact rock that was copied for the cartoon.
